Within the SET Plan framework and under the scope of the Belgian Presidency Semester, the **Implementation Working Group on Sustainable and Efficient Energy Use in Industry (IWG-Ind)** will hold its **2024 Annual Event: Advancing Sustainable Energy in Industry**.

REGISTER to secure your attendance!

Event Details:

Date: 5 June 2024

Time: 13:00 – 18:00, and **cocktail session** 18:00 - 20:00

Venue: Michaux Auditorium, La Bourse, Place d'Armes 1, Namur, Belgium

Agenda: check out the **DRAFT AGENDA OF THE EVENT**.

This event, organised by the SET-IndEU Secretariat as a satellite event of IndTech 2024, the EU flagship conference on Industrial Technologies, will address a technical audience on the following **industrial topics**:

Main challenges of the process industry – current drawbacks and needs;

What the European Union is doing – EU-funded projects and SET Plan implementation actions;

Critical issues to advancing the sustainable development of EU's energy-intensive industry by 2030 and 2050.

Two interactive panels will engage EU and national projects to present and discuss their major results:

The Renewable Route: RES in industry: integration, availability and competitiveness;

Igniting Industrial Innovation: Heat recovery and upgrading in industry and heat2power.

The event will be followed by a **networking cocktail session**.

Getting There: Namur, just 65 km from Brussels, is easily accessible by train. **Trains run every half hour, making it convenient for attendees from all major Brussels stations.** The last train from Namur to Brussels leaves at 22:15.

More information and the agenda will follow soon.
