ZERO-BRINE

Full Title: Re-designing the value and supply chain of water and minerals: a circular economy approach for the recovery of resources from saline impaired effluent (brine) generated by process industries

Aim:

A circular economy approach to recover resources from brine generated by process industries
A circular economy approach to recover resources from brine generated by process industries.

Concept:

ZERO BRINE advances innovative solutions to address global water challenges by recovering resources from wastewater generated by process industries.
