

SPIRE-11-2017

SPRING

Full Title: Setting the framework for the enhanced impact of SPIRE projects

Aim:

Project SPRING's objective is to increase progression towards the SPIRE goals and enhance project return on investment by addressing the needs and barriers of those who make the decisions to adopt process innovations in industry.

Concept:

Through partners Britest, INEOS, IRIS and CRIT, Project SPRING represents a consortium of SPIRE projects (EPOS, STYLE, SHAREBOX, IbD, PROPAT, DREAM and CoPro), plus the Factories of the Future project: FoF-IMPACT. The SPRING concept is to evaluate the outputs of these case study projects and with the input of the Centre for Decision Research at Leeds University Business School, develop a framework for A.SPIRE to enable greater impact of all SPIRE projects. The framework is expected to include guidance for project participants, network groups (for coordinators and sustainability practitioners), thematic workshops, and improvements to the www.spire2030.eu web portal to enable outputs from SPIRE projects to be more easily accessed by end-users in industry and education/training providers.

Start date:
