Hubs4Circularity Community of Practice

Full Title: Hubs4Circularity Community of Practice

Aim:

The Hubs4Circularity Community of Practice is a network of public and private stakeholders from industries, regions, and cities, set up under Horizon Europe to facilitate building, scaling up and replicating of ecosystems of industrial and industrial-urban symbiosis, as well as circular economy initiatives. Through a digital knowledge platform, this initiative curates knowledge, tools, models, and solutions, making them accessible to the Community of Practice. As part of the project, expert groups and advisory panels will be created to analyse challenges and solutions, exchange best practices, provide policy recommendations, and develop metrics to assess the maturity of regional initiatives in collaboration with Hubs4Circularity demonstration sites.

Note: The Hubs4Circularity Community of Practice is the result of 2 individual projects: H4C EUROPE (Building a European Community of Practice of Hubs for Circularity) and H4C ECoP (European Community of Practice supporting Hubs for Circularity). The 2 projects cooperate to deliver the Hubs4Circularity Community of Practice.

Start date:

01/06/2022
